### **DETAILED ACTION**

This office action is in response to the Request for Continued Examination filed 11/28/2007.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 11/28/2007 was filed after the mailing date of the Notice of Allowance on 11/6/2007. The submission is in compliance with the provisions of 37 CFR 1.97.

Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Allowable Subject Matter***

Claims 28-43 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the claimed system comprising, among other things: a plurality of actuator mechanisms, each having an approximately identical control capability, wherein the control capability includes approximately identical maximum actuation rate and approximately identical maximum actuation force, at least one actuator mechanism being coupled to each of the control surfaces to actively position the control surfaces in response to command signals, wherein the plurality of actuator mechanisms are the only actuator mechanisms coupled to the control surfaces to actively move the control surfaces in response to the command signals.

The prior art of record teaches using actuator mechanisms of different maximum actuation rates and forces for different locations and control surfaces of the vehicle. The prior art teaches the use of identical sensors and control systems to monitor and control the different actuator mechanisms.

However, none of the prior art of record either singularly or in combination teaches the claimed invention in its entirety.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
